LAUNDRY

ALL NATURAL LAUNDRY DETERGENT

All Natural & Environmentally Friendly Laundry Detergent

Industrial Strength Cleaner for All Fabrics Without Harmful Chemicals and Good for Low-water Environments

A New Concept in Cleaning

EcoStar Laundry is intended for commercial use to replace the alkaline cleaners currently in use. It requires no special disposal treatment, and is a non-hazardous material. It works well with hot or cold wash or rinse and may be reused (saving both water and cleaner). It is environmentally friendly. Unlike most cleaners, ecoStar Laundry leaves a clean fresh smell to cloth instead of the oily odors repair industry customers have become accustomed to.

EcoStar Laundry aids in the emulsification of oils and grease while helping to eliminate certain odors. There has been some success in the removal of some types of printing ink from cloth materials.

By reducing the costs involved in treating for disposal of cleaners now used and by reducing water consumption, ecoStar Laundry can prove to be cost effective.

Product Details

- **Thoroughly Cleans Fabrics:**
Penetrates fabric fibers, bringing bacteria and particles to the surface to be washed away, and even removes grease and oils
- **Leaves No Residue:**
Fabrics are left clean and fresh
- **Eliminates Odors:**
Decomposes the organic matter that causes odors
- **Safe for All Washable Fabrics:**
Will not damage fabrics
- **Easy to Use:**
Can be reused and rinses quickly and easily
- **Pleasant Odor:**
No irritating or chemical odors left on fabrics
- **Economical and Convenient:**
Saves our customers time and money
- **Nonflammable and Long Shelf Life:**
Safely used around open flames, store below 110°F in shade in sealed container
- **All Natural Ingredients:**
No phosphates, no nitrates, no VOCs, and no flash point
- **Safe for People and the Environment:**
Nontoxic and non-irritating to humans, animals, marine life and plants

Applications

- **Commercial Washing Machines:**
Mix ecoStar Laundry at a ratio of 5-1 with water (preferably non-chlorinated) and wash as usual (hot water is not necessary).
- **Hand Washing:**
Mix ecoStar Laundry at a ratio of 5-1 with water and wash as usual. Wash water may be reused until suds no longer produced.

Dilution Guidelines

Mix ecoStar Laundry at a ratio of 5-1 with water (preferably non-chlorinated) and wash as usual (hot water is not necessary). Transfer cloth to rinse stage and save wash water (contaminants may be filtered out and product re-used). It is not necessary to acid treat wash water before disposal as is the case with other cleaners.

As a general rule, when wash material no longer produces suds when agitated, you will need to add more ecoStar Laundry in a sufficient quantity to produce desired sudsing. Number of times product may be re-used and ratio of mix depends upon types of material cleaned, method of cleaning, and degree of contamination.

Physical Properties

Form	Liquid
pH	5.0-6.0
Specific Gravity	1.02
Appearance	Dark Brown
Boiling Point	Water
Flash Point	None
Shelf Life	5+ Years*
Fuming Properties	None
Biodegradable	Yes

* if kept in sealed container, stored in shade and not exposed to extreme heat (over 110°F) for prolonged periods of time.
